

3/8" @ 600 PSI - DELTA PLATED BRASS W/LEVER (C1)

SKU: 165 7481

3/8" BSP F In/Outlet
600 PSI Max Pressure
100° C Max Temp

DELTA BALL VALVES

The Delta series made by Effebi is a newly launched premium Italian nickel plated ball valve specifically created for 3-way connections when plumbing a low to moderate pressure system. These Italian ball valves are manufactured with self-washing PTFE seals to prevent corrosion from mixed caustic liquids creating a longer service life in tough conditions. The Delta series also features self-adjusting upper seats near the handle for an extremely smooth actuation when switching from one liquid to another.

Features

- Seals manufactured with PTFE (Polytetrafluoroethylene) for improved performance with high heat and chemicals
- Italian nickel plated brass housing
- Steel long handle

Specifications

- **Max Pressure:** 600 PSI
 - **Inlet:** 3/8" BSP F
