

SKU: 165 MM15250R

Pressure 3625psi

Flow 15-18L/min

Speed 1450-1740rpm

Mazzoni high pressure pumps:

- Ground pistons for smoother stroke and better oil-tightness.
- Oversized shaft and long end section for better torque transmission.
- Extra-thick ceramic pistons for greater durability
- Intake and delivery valves with larger water passages
- Rods made of a special alloy antifriction
- Forged brass pump head, designed for strength
- Double gasket sealing system – On Demand high temperature seals 85°C
- Tapered roller bearings with high resistance
- Body of the pump designed for long-term durability
- Seals “U”

Specification:

- Pressure 3625psi
 - Flow 15-18L/min
 - Speed 1450-1740rpm
 - Power 9.74 - 11.69Hp, 7.27-8.72Kw
 - Weight 10.4kg
