

VRPP450-200

**New pneumatic-controlled pressure regulating valve
for very high flow rates**

Part No.	60.5360.00	
Rated Pressure	bar	200
	psi	2,900
Permissible Pressure	bar	220
	psi	3,200
Rated Flow Rate	Lpm	450
	USGpm	120
Rated Temperature	°C	90
	°F	196
Maximum Air	bar	6
	psi	87
Compressed Air	1/4 Bsp F	

Technical Features

Pneumatic piston control
 Pneumatic piston under pressure: max pressure defined. Without air pressure: zero by-pass
 Possibility to adjust the max pressure
 Built to work with big flow rates
 Suitable for multiple outlet use
 High balancing to guarantee slight variations of the rated pressure when the flow varies in by-pass
 Sturdy construction in brass
 Return action of the piston by means of a powerful spring, for a secure function and reliable pressure adjustment
