

POWER EQUIPMENT

DIESEL INFARED RADIANT HEATER HK220IR

75,000 BTU - 22KW

WORKSHOP

SERIES

Fuel Type: Diesel / Kerosene

Heat Output: 22KW

Model: HK220IR

The HK070IR uses radiating infrared heat waves to heat “objects”, not air, for even heat distribution.

Super clean burning for higher levels of safety and almost zero emissions.

- Highly Efficient Silencer System - Only 40dB
- Catalytic Filtering - Allows for use in ventilated indoor areas
- Internal Safety System - Includes low fuel sensor, over heating sensor for piece of mind operation
- Large 45L Tank - Up to 22 hours run time
- Digital Control Panel and Remote Control
- High Quality Stainless Steel Finish
- Portable With 4x Lockable Wheels
