

Sewer Cleaning & Water Jetting Hose

COBRA sewer cleaning hose is engineered and manufactured to handle the toughest and most harsh conditions found in high-pressure sewer cleaning applications. Its thermoplastic composition and unique bonded construction allows for a flexible and light-weight hose, along with superior kink resistance, and improved fitting retention. The high tensile strength polyester reinforcement provides for exceptional low volumetric expansion and eliminates moisture absorption. **Cobra** also features a tough polyether-urethane cover that offers maximum resistance to cutting, abrasion, various chemicals, and fungus.

In accordance with **WASTEC** (formerly **WEMI**) specifications, **Cobra** sewer cleaning hose offers a green/cream colored inner tube and corresponding markings on all assembly components. **Cobra** hose cover colors conform to industry standards for maximum operating pressure ratings.

Reinforcement: Braided polyester fibers.
Temperatures: -40°F. to +135°F. (-40°C. to +57°C.)

For safety assurance, Cobra sewer cleaning hose is factory tested and sold as assemblies only.

FITTINGS & TOOLING FOR FIELD COUPLING OF COBRA SEWER CLEANING HOSE

POLYFLOW offers the **Cobra** Swage Tools for the field attachment of end fittings and menders. To assure proper matching of all components, the hose tube, material, end fittings, menders, and tooling must be color coded white. It is important to note that fittings and menders for thermoplastic hose are not necessarily interchangeable. By following the **Cobra** hose inspection instruction card (included with each reel of hose), and swage assembly instructions, the user can be assured of making an acceptable hose assembly.
